# Driver lifetime & LED light decay rate

# Temperature

- The testing is operated at 25°C
- The lifetime of capacitor, minimum of 5,000 hours if operated at 105°C, will be doubled whenever the temperature drops 10°C
- The highest withstand temperature of IC, MOS could be 120°C
- The highest withstand temperature of LED junction temperature is 150°C

The driver lifespan is based on capacitor working temperature.

# Installation

1 Take out the accessories from accessory box.

2 Determine mounting location and knock the plastic anchor into ceiling, fix bracket with screw into the ceiling.

3 Take out the lamp, connect the corresponding polarities between the wires on the ceiling and terminal block by screwdriver.

4 Proper alignment of mounting holes between back plate and mounting bracket, then lock them together with screw.
